

Data Dictionary for glider data

time – unit: UTC time – time that data was collected

latitude – unit: degrees_north – interpolated latitude for each data point

longitude – unit: degrees_east – interpolated longitude for each data point

depth – unit: meters - depth of datapoint collected, positive down

sea_water_temperature – unit: degree_C – sea water temperature

sea_water_practical_salinity – unit: PSU – sea water practical salinity

sea_water_density – unit: kg/m³ – sea water density

micromoles_of_oxygen_per_unit_mass_in_sea_water – umol/kg – micro moles of oxygen per kilogram of water
